RURAL DEVELOPMENT 2013: INNOVATIONS AND SUSTAINABILITY

28-29th November, 2013

Aleksandras Stulginskis University
Akademija, Kaunas district, Lithuania

Dear researchers, rural development policy makers and specialists

It is my pleasure to invite you to participate in the sixth international scientific conference „Rural Development 2013: Innovations and Sustainability“. The main attention will be paid to the experience of the Rural Development Programme during the period of 2007-2013 and the perspectives of this programme for the coming period of 2014-2020.

It is the bi-annual platform for the interdisciplinary-scientific discussions on sustainable rural development and innovations.

I am pleased to welcome you at Aleksandras Stulginskis University (ASU), which has recently started a new development period with new name, new strategy and ambitious goals for the future. The university has become more advanced and more open to the society.

We clearly state that we serve our mission by creating and disseminating scientific knowledge, sincerely striving for safe and healthy food and full-fledged living environment for every citizen of Lithuania. But our mission goes beyond our country. We are getting very much international, serving many people of the planet and sharing our knowledge with them. We are open to challenges and changes, adopting the best experience of the world universities, developing internationally, at the same time serving our own country, seeking continuous improvement and leadership among the best universities of our area.

This conference is a demonstration that we are able to go in front line with global changes and innovations. We are strong in partnership by sharing the innovative ideas, experience and results of our research.

Issues of effective sustainable development and innovations will be discussed in different sections of this conference:

Section 1. Engineering and Environment of Biosystems

Section 2. Food Safety and Security

Section 3. Multifunctional Approach to Sustainable Use of Natural Resources

Section 4. Social Innovations of Regional Rural Development

Section 5. Future and Present Policy of Agriculture and Rural Development

Political forum "2007-2013 Experience and 2014-2020 Rural Development Programme Perspective"

Together we can create synergy by broad participation of scientists, practitioners, policy makers, private sector actors, NGO from different sectors of the society. All the participants will be awarded the possibility to share their experience related to the sustainable agriculture and rural development.

Finally, I want to introduce our new inspiring motto „Will to change, power to create“. Be active and creative. Have an enjoyable stay at ASU.

Yours sincerely,

Prof. dr. Antanas Maziliauskas
