The pilot 2021/2022

GPDM

The pilot 2021/2022

Topics

- Learn how to develop a **project idea** and prepare a **proposal**
- By working on an example
- In a mixed team
- **Blended learning** – online and offline, learning community
- Special focus: **Rebuild** better, war and post-war related challenges
- Exchange with **Think Tank** ERUKA "Empowerment and resilience of Ukrainian academia in the field of socio-ecological reconstruction and restoration"

Schedule

Time plan	Kick-off Wednesday 22.03.23	Wednesday 2 29.03.23 1:30-3:30 pm CET	Wednesday 3 19.04.23	Wednesday 4 10.05.23	Wednesday 5 31.05.23	block week 05.06.23	block week 06.06.23	block week 07.06.23	block week 08.06.23	block week 09.06.23	Wednesday 6 21.06.23	open	end of July
Lectures	Green PM / R&D projects PM as a process Planning and team building	How to start / problem analysis	Stakeholder analysis	Goals and objectives	Workplan	Project examples			EU Funding schemes (DG)		MARISCO software & tools		
Exercises		Project Initiation doc		Objective analysis Risk matrix	Logical Framework Work breakdown structure Roles Budget of the project								
Seminar													
Group Work / Coaching	Group formation										further elaboration of project sketches		
Peer Review / Results								Elevator pitch				Final presentations	Delivery of project proposals / paper
Other	Get to know each other Distribution of seminar topics How we want to work & what we will do								Conference with Think Tank	Reflection			
Additional online material			Project communications	Risks and Uncertainties	Evaluating Project Results								

Information & Application

Module description

Module	Green Project Development and Management	
Study courses	All Master & PhD courses at HNEE & UNFU	
Semester	Summer term	
Module coordinator	Prof. Dr. Ihor Soloviy	
Lecturers	Prof. Dr. Ihor Soloviy, Prof. Dr. Orest Kiyko, + guests	
Status	Specialisation module	
ECTS-Credits	6	
SWH	4	Workload: 150 h
Max. study places	~6 from each university	
Teaching form	Blended Learning (online and offline mix) with lectures (20h), seminars (18h), practical exercises (22h) and self-study (90h)	Module type: partly blocked (05.06. – 09.06.2023), 6 online meetings before and after block week on Wednesday afternoons (13:30-15:30h) 22.03.,29.03.,19.04.,10.05.,31.05.,21.06.
Language	English	
Entry requirements	Good English level (at least B2), no proof needed	
Examination form	Project presentation (50%) project report (proposal) (50%)	
Goal	Students are able to develop a project idea towards a project application in an international and interdisciplinary team. They have an overview of the EU-funding landscape as well as about the management of projects and teams.	
Content	<p>The course introduces the students to the project management logic. Using examples presented, but above all using a project application to be developed by the participants themselves, the various steps in the development of a project application are performed and reflected upon. These include: identification of ideas, situation analysis with target group analysis, formulation of goals and development of a project intervention logic; and based on this: concrete project planning with partner setting, work packages and responsibilities as well as time and budget planning. Emphasis is placed on the precise alignment of the project idea with the funding programme objectives and criteria, as well as on the presentation of the long-term impact and usability of the project results.</p> <p>A special focus this time will lay on Ukraine-specific ((post-)war) issues and thus on the sustainable restoration of socio-ecological systems. For this, the participation and integration of the students in meetings of the think tank ERUKA, founded in November 2022, is planned. In this think tank, a large number and diversity of Ukrainian academics and practitioners work together to identify project ideas, use synergies and jointly develop projects for a green reconstruction and transformation of Ukrainian socio-ecological systems.</p> <p>This module is jointly implemented by the HNEE and the Ukrainian National Forestry University. There will be a maximum of 6 graduate students from each university participating. After an initial introductory event that gives an overview of the module and initiates the group building and idea generation, the students transition into the first online working phase</p>
