Student Assistant (m/f/d)

International Sustainability Marketing & Hotel Outreach

CSI Green Star Certification | Christopherus Stiftung International

Duration: initially one semester · Working arrangement: flexible, primarily remote · Compensation: performance-based commission of 10–15%; legal terms to be agreed

About Us

Christopherus Stiftung International (CSI) is committed to sustainable development and responsible business practices. Through our Green Star Certification programme, we help hotels, resorts, spa and healthcare facilities in Germany and internationally assess their sustainability performance, identify opportunities for improvement and implement environmentally friendly technologies – particularly in energy, water and waste management.

Your Responsibilities

- Research and identify suitable hotels, hotel groups, resorts, spa and healthcare facilities.
- Independently approach prospective clients by email, telephone and professional networks.
- Clearly present the Green Star certification concept and the foundation's work.
- Encourage establishments to complete the free sustainability self-assessment.
- Explain the benefits of certification and sustainable technology solutions.
- Follow up with contacts through to the certification decision and maintain accurate records.

Green Star Founding 20

CSI is currently personally inviting 20 carefully selected hotels, chosen for their publicly demonstrated commitment to sustainability, to receive a free initial certification. You may assist with relationship management and follow-up. Your primary focus will be acquiring additional establishments for the regular, paid certification programme.

Your Profile

Ideally, you are studying tourism management, sustainability management, environmental science, business administration, marketing or a related subject. You are interested in sustainable tourism, enjoy communicating, work independently and reliably, and have good German and English language skills. Additional languages and initial experience in client acquisition are welcome.

Compensation and Commission

For each successfully referred establishment that completes a paid Green Star certification, a commission of 10–15% of the net certification fee actually received is envisaged. The exact rate, payment date and form of engagement will be agreed contractually in advance. Any statutory minimum remuneration entitlements remain unaffected. Founding 20 pilot certifications are free of charge; any recognition bonus for these would require a separate agreement.

What We Offer

An international sustainability project with room for initiative; insights into the hospitality industry and environmental technologies; flexible working hours; responsibility for your own contacts; direct collaboration with CSI; and the possibility of continuing beyond the first semester.

How to Apply

We welcome a brief introduction outlining your course of study, language skills and possible start date. Please email us at mnn@csi-germany.de.
